BUSINESS STRATEGY. "The 4 Disciplines of Execution "offers the what but also how effective execution is achieved. They share numerous examples of companies that have done just that, not once, but over and over again. This is a book that every leader should read! (Clayton Christensen, Professor, Harvard Business School, and author of "The Innovator s Dilemma)." Do you remember the last major initiative you watched die in your organization? Did it go down with a loud crash? Or was it slowly and quietly suffocated by other competing priorities? By the time it finally disappeared, it s likely no one even noticed. What happened? The whirlwind of urgent activity required to keep things running day-to-day devoured all the time and energy you needed to invest in executing your strategy for tomorrow. "The 4 Disciplines of Execution" can change all that forever.

#1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible

advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

The Four Disciplines of Execution is about a simple, proven formula for reaching the goals you want to reach as a business or individual. In Covey's experience, the thing that most undermines the ability to execute goals is what he calls the Whirlwind: those urgent tasks that must be done simply to keep an organization alive. As Covey shows, the only way to execute new, important goals is to separate those goals from the Whirlwind. The Four Disciplines allow

leaders to create a strategy that requires a change in behaviour, since only by ensuring that everyone on the team understands the goal, knows what to do to reach it and knows whether progress is being made, will a leader produce consistent breakthrough results while sustaining the urgent work of the Whirlwind. The Four Disciplines of Execution are: 1. Focus on the Wildly Important; 2. Act on the Lead Measures; 3. Keep a Compelling Scoreboard; 4. Create a Cadence of Accountability. For more than a decade FranklinCovey has been studying what it takes to achieve important goals, and in this book they share success stories from a wide range of companies that have implemented the Four Disciplines to result in greater profits, increased market share and improved customer satisfaction. This way of thinking is essential to any company that wants to not only weather, but thrive in this economy.

The best-selling author of *The 7 Habits of Highly Effective Teens* outlines a proven formula for achieving goals, explaining how individuals and organizations can hone four execution-based skills in areas of focus, documentation and accountability. 250,000 first printing.

If there is one thing that is certain in business, it is uncertainty. Still, there are great organizations that perform consistently and with excellence, regardless of the conditions. This practical book is about getting predictable results in good times and bad by applying four key principles.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals

and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
