The VW Beetle is an air cooled vehicle, there is no cooling system other than the air passing over the engine and keeping your oil cool.

Therefore oil is the life blood of your engine. There is nothing that will ruin an engine faster than low oil or no oil in the engine,

the full story. German automakers originally sought to supply their countrymen with an automobile that was easy to mass produce. By 1938, they finalized the design for the VW "Bug"--the first rear-engined, rear-wheel-drive configured car. In its heyday, the little rounded Beetle was

produced at a rate of more than one million per year. Today, with more than 23 million cars built, the Beetle holds the record as the most-produced passenger car of all time. But the Beetle is only one part of the air-cooled

Volkswagen story.

The rest--from Type 2 vans, pick-ups, and
