Take This Important Acid,
Base, and Salt Test if you
are looking for a way to
test out just how much you
know about them. For you to
pass this quiz, you will
need to have some knowledge
when it comes to formulas of
different acid salts and
base and their properties.
Do give it a shot, and feel
free to take the quiz as
much as you need.

Problems Answers

In it we find out the difference between alkalis and bases, how acids and alkalis react with one another, how neutralisation can produce salts and the relevance of pH values. Acids and alkalis are incredibly important for manufacturing, and for everyday life. Some examples of things made using acids and alkalis are soaps and detergents, fertilisers, car batteries and medicines - you will have probably learnt a lot more examples during your lessons, as well as the properties of acids and alkalis.

not consume in the household are used in the laboratories and industries, which include an acid such as HCl, H_2SO_4 etc. and bases such as NaOH, KOH etc. When these acids and bases are mixed in the right proportions, the neutralization reaction thus results in the formation of salt and water. Some naturally occurring salts found in nature include NaCl and KCl etc in seawater and natural rock deposits. In this section, we will read more about acid, base and salt ...
