This corpus-based study of allusions in the British press shows the range of targets journalists allude to - from Shakespeare to TV soaps, from Jane Austen to Hillary Clinton, from hymns to nursery rhymes, proverbs and riddles. It analyzes the linguistic forms allusions take and demonstrates how allusions function meaningfully in discourse. It explores the nature of the background cultural and intertextual knowledge allusions demand of readers and sets out the processing stages involved in understanding an allusion. Allusion is integrated into existing theories of indirect language and linked to idioms, word-play and metaphor.

It takes enviable skill and dedication to achieve mastery in the arts. Yet even more remarkable is the artist who widens his scope to venture beyond his already widely acclaimed signature style. Few would dare to even consider such a risk... However, in Senza Parole, Marc Lagrange is audacious enough to make that thrilling leap as he boldly showcases a broad array of distinctive approaches--everything from starkly straight nude studies--in the honorable tradition of Helmut Newton--to Lagrange's more typically intricate and exotic compositions. The photographer's devoted followers will still find the dream-like eroticism he is known for, yet, in this work, each photograph is one of a kind, with Lagrange's hallmark of technical perfection. As one would expect from Lagrange, each tableau is carefully configured with not a single detail left to chance.

Originally published in German in 1988, The Apocalypse in Germany is now available for the first time in English. A fitting subject for the dawn of the new millennium, the apocalypse has intrigued humanity for the last two thousand years, serving as both a fascinating vision of redemption and a profound threat. A cross-disciplinary study, The Apocalypse in Germany analyzes fundamental aspects of the apocalypse as a religious, political, and aesthetic phenomenon. Author Klaus Vondung draws from religious, philosophical, and political texts, as well as works of art and literature. Using classic Jewish and Christian apocalyptic texts as symbolic and historical paradigms, Vondung determines the structural characteristics and the typical images of the apocalyptic worldview. He clarifies the relationship between apocalyptic visions and utopian speculations and explores the question of whether modern apocalypses can be viewed as secularizations of the Judeo-Christian models. Examining sources from the eighteenth century to the present, Vondung considers the origins of German nationalism, World War I, National Socialism, and the apocalyptic tendencies in Marxism as well as German literature--from the fin de siècle to postmodernism. His analysis of the existential dimension of the apocalypse explores the circumstances under which particular individuals become apocalyptic visionaries and explains why the apocalyptic tradition is so prevalent in Germany. The Apocalypse in Germany offers an interdisciplinary perspective that will appeal to a broad audience. This book will also be of value to readers with an interest in German studies, as it clarifies the riddles of Germany's turbulent history and examines the profile of German culture, particularly in the past century.

In recent work, Berlin-based photographer Daniel Josefsohn (born 1961) maintains a balancing act between provocation and humor, between irony and political incitement. In addition to a selection from a photo column for ZEITmagazin, this volume presents a cross-section of Josefsohn's entire work.

In the modern lexicon, 'object' refers to an entity that is materially constituted, spatially defined, and functionally determined. In contrast, the Latin word 'fantasia' has, since antiquity, referred to an apparition or the ability to imagine something that could be equally an object, an image, or a concept. This tension prompts further inquiry into the interrelations and differences between the experience of tangible objects (their perception and handling) and the creation of new objects (their conception and formation). What correlations exist between object fantasies, the self-consciousness of subjects, and the concrete and imagined conditions of human beings' social lives? By addressing this question, this interdisciplinary book opens new perspectives in the field of object studies.
