Getting a Rover K-Series engine properly up and running can be a difficult task, but ultimately the result is always worthwhile. Illustrated with over 300 photographs, Rover K-Series Engine - Maintenance, Repair and Modification is a practical guide to keeping these unique engines in fine working order. The most well-known issue with the K-Series is the head gasket, and this book demonstrates how to identify common faults, before giving practical advice on how best to solve them. Step-by-step guidance on all aspects of long-term engine maintenance is provided, in addition to the improvements required to prevent further problems. A K-Series engine is then stripped down to examine its clever and interesting structure, and is rebuilt with improvements. Authors of over twenty automotive books and countless articles in assorted motoring magazines, Iain Ayre and Rob Hawkins have combined their knowledge to bring you this book on the Rover K-Series engine, which is fully illustrated with 356 colour photographs.

First trialled in Europe in the spring of 1945, but formally introduced into British Army service in December 1946, not only is the Centurion one of the most important tanks in the history of the British armoured fighting vehicle (AFV), but it is also one of the most significant post-war Western tanks. Between 1946 and 1962, 4,423 Centurions were built in 13 basic marks and numerous variants, with the chassis also adapted for several other AFV roles. A small number of the Beach Armoured Recovery Version (BARV) served with the British forces during the Iraq War of 2003, some 58 years after the Centurion first entered service! The Centurion has seen extensive combat in the Korean War (Britain), Vietnam (Australia), the Middle East (Israel) in the 1967 Six Day War, 1973 Yom Kippur War, and during the 1978 and 1982 invasions of Lebanon, and in the Indo-Pakistan War (India) in 1965 where it fought against US-supplied M47 and M48 Patton tanks.
