How do reality television programs shape our view of the world and what we perceive as real and normal? This book explores the bizarre and highly controversial world of reality television, including its early history, wide variety of subject matter, and social implications. □ Explains why reality television plays such a large role in popular culture and why it is so representative of American society in the 21st century □ Contextualizes reality television as a postmodernist form of new media that has vastly altered the landscape of traditional television programming □ Examines the phenomenon of reality programming in the context of the history of radio and television broadcasting as it originated in the U.S. market □ Answers the common question, "Why would anyone want to watch this show?" by describing and analyzing the reason for a specific program's construction—and often, success—within the framework of audience study findings

Driving Identities examines long-standing connections between popular music and the automotive industry and how this relationship has helped to construct and reflect various socio-cultural identities. It also challenges common assumptions regarding the divergences between industry and art, and reveals how music and sound are used to suture the putative divide between human and non-human. This book is a ground-breaking inquiry into the relationship between popular music and automobiles, and into the mutual aesthetic and stylistic influences that have historically left their mark on both industries. Shaped by new historicism and cultural criticism, and by methodologies adapted from gender, LGBTQ+, and African-American studies, it makes an important contribution to understanding the complex and interconnected nature of identity and cultural formation. In its interdisciplinary approach, melding aspects of ethnomusicology, sociology, sound studies, and business studies, it pushes musicological scholarship into a new consideration and awareness of the complexity of identity construction and of

influences that inform our musical culture. The volume also provides analyses of the confluences and coactions of popular music and automotive products to highlight the mutual influences on their respective aesthetic and technical evolutions. *Driving Identities* is aimed at both academics and enthusiasts of automotive culture, popular music, and cultural studies in general. It is accompanied by an extensive online database appendix of car-themed pop recordings and sheet music, searchable by year, artist, and title.

Trading up isn't just for the wealthy anymore. These days no one is shocked when an administrative assistant buys silk pajamas at Victoria's Secret. Or a young professional buys only Kendall-Jackson premium wines. Or a construction worker splurges on a \$3,000 set of Callaway golf clubs. In dozens of categories, these new luxury brands now sell at huge premiums over conventional goods, and in much larger volumes than traditional old luxury goods. *Trading Up* has become the definitive book about this growing trend.
