Recent atrocities have ensured that terrorism and how to deal with terrorists legally and

politically has been the subject of much discussion and debate on the international stage. This book presents a study of changes in the legal treatment of those perpetrating crimes of a political character over several decades. It most centrally deals with the political offence exception and how it has changed. The book looks at this change from an international perspective with a particular focus on the United States. Interdisciplinary in approach, it examines the fields of terrorism and political crime from legal, political science and criminological perspectives. It will be of interest to a broad range of academics and researchers, as well as to policymakers involved in creating new anti-terrorist policies.

This book is the fifth in a planned series of books that examine key topics (e.g., learner modeling, instructional strategies, authoring, domain modeling, assessment, impact on learning, team tutoring, machine learning, and potential standards) in intelligent tutoring system (ITS) design through the lens of the Generalized Intelligent Framework for Tutoring (GIFT) (Sottolare, Brawner, Goldberg & Holden, 2012; Sottolare, Brawner, Sinatra, & Johnston, 2017). GIFT is a modular, service-oriented architecture created to reduce the cost and skill required to author ITSs, manage instruction within ITSs, and evaluate the

effect of ITS technologies on learning, performance, retention, transfer of skills, and other instructional outcomes. Along with this volume, the first four books in this series, Learner Modeling (ISBN 978-0-9893923-0-3), Instructional Management (ISBN 978-0-9893923-2-7), Authoring Tools (ISBN 978-0-9893923-6-5) and Domain Modeling (978-0-9893923-9-6) are freely available at [www.GIFTtutoring.org](http://www.GIFTtutoring.org) and on Google Play.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Design Recommendations for Intelligent Tutoring Systems (ITSs) explores the impact of intelligent tutoring system design on education and training. Specifically, this volume examines “Authoring Tools and Expert Modeling Techniques”. The “Design Recommendations book series examines tools and methods to reduce the time and skill required to develop Intelligent Tutoring Systems with the goal of improving the Generalized Intelligent Framework for Tutoring (GIFT). GIFT is a modular, service-

oriented architecture developed to capture simplified authoring techniques, promote reuse and standardization of ITSs along with automated instructional techniques and effectiveness evaluation capabilities for adaptive tutoring tools and methods.

In today's hyper-transparent world, consumers have enormous power to decide which brands are worth their time and money—so how do you make sure they choose yours? Unfortunately, most leaders and organizations are stuck following archaic, detrimental business practices. Meanwhile, savvy consumers and employees across every generation are making their stance perfectly clear: They are not interested in supporting organizations that seem inauthentic, soulless, or untrustworthy. In this environment, only the honest will survive. In *Honest to Greatness*, serial Inc. 5000 entrepreneur Peter Kozodoy shows how today's greatest business leaders use honesty—not as a touchy-feely core value, but as a business strategy that produces game-changing, industry-dominating success. Through case studies and interviews with leaders at Bridgewater Associates, Sprint, Quicken Loans, Domino's, The Ritz-Carlton, and more, Kozodoy presents fresh business concepts that anyone in the workplace can implement in order to:

- Reach, engage, and retain your best customers
- Attract and inspire the best talent in any industry
- Create an unbeatable culture of innovation

that dominates your competitors • Earn your team's respect and loyalty • Unlock deep personal fulfillment by setting the "right" goals Filled with powerful lessons for current and future leaders, this timely book demonstrates how to use honesty at both the organizational and individual level to achieve true greatness in business and in life.

Until very recently, pragmatics has been restricted to the analysis of contemporary spoken language while historical linguistics has studied historical texts and language change in a decontextualized way. This has now radically changed and scholars from around the world are trying to build a new theoretical framework that integrates recent advances both in pragmatics and in historical linguistics. The volume, which contains 22 original articles, starts with an introduction that is both a state-of-the-art account of historical pragmatics and a programmatic statement of its future potential and its different subfields. Part I contains seven pragmaphilological papers that deal with historical texts and their interpretations by paying close attention to the communicative context of these texts. The second and third parts comprise papers in diachronic pragmatics. The ten papers of part II take a linguistic form as their starting

point, e.g. particular lexical items or syntactic constructions, and study their pragmatic functions at different times (diachronic form-to-function mappings), while the four papers of part III take a particular pragmatic function as their starting point, e.g. discourse strategies or politeness, and study their linguistic realisation at different times (diachronic function-to-form mappings).

Design Recommendations for Intelligent Tutoring Systems explores the impact of intelligent tutoring system design on education and training. Specifically, this volume examines “Instructional Management” techniques, strategies and tactics, and identifies best practices, emerging concepts and future needs to promote efficient and effective adaptive tutoring solutions. Design recommendations include current, projected, and emerging capabilities within the Generalized Intelligent Framework for Tutoring (GIFT), an open source, modular, service-oriented architecture developed to promote simplified authoring, reuse, standardization, automated instructional management and analysis of tutoring technologies.

Between 1415, when the Portuguese first used convicts for colonization purposes in the North African enclave of Ceuta, to the 1960s and the dissolution of Stalin's gulags, global powers including the Spanish, Dutch, Portuguese, British, Russians, Chinese and Japanese transported millions of convicts to forts, penal settlements and penal colonies all over the world. A Global History of Convicts and Penal Colonies builds on specific regional archives and literatures to write the first global history of penal transportation. The essays explore the idea of penal transportation as an engine of global change, in which political repression and forced labour combined to produce long-term impacts on economy, society and identity. They investigate the varied and interconnected routes convicts took to penal sites across the world, and the relationship of these convict flows to other forms of punishment, unfree labour, military service and indigenous incarceration. They also explore the lived worlds of convicts, including work, culture, religion and intimacy, and convict experience and agency.

120 incredible, moving photographs that reveal the power of photography Curated by leading gallerist, Peter Fetterman "When I photograph, I project what I'm not. What I would like to be." - Lillian Bassman The power of photography lies in its ability to ignite emotions across barriers of language and

culture. This selection of iconic images, compiled by pioneering collector and gallerist Peter Fetterman, celebrates the photograph's unique capacity for sensibility. Peter has been championing the photographic arts for over 30 years. He runs what is arguably the most important commercial photography gallery in the world. During the long months of lockdown, Peter 'exhibited' one photograph per day, accompanied by inspirational text, quotes and poetry. This digital collection struck a chord with followers from around the world. The Power of Photography presents 120 outstanding images from the series, along with Peter's insightful words. This carefully curated selection offers an inspiring overview of the medium while paying homage to masters of the art. From the bizarre Boschian fantasies of Melvin Sokolsky to the haunting humanity of Ansel Adams's family portraits; from Miho Kajioka's interpretation of traditional Japanese aesthetics of to the joyful everyday scenes of Evelyn Hofer; from rare interior shots by famed nude photographer Ruth Bernhard to Bruce Davidson's wistful depiction of young men playing ballgames on a street; this book gathers some of the most unique and heartening photographs from the 20th century. Each image is a time capsule, offering us a glimpse into days gone past. Yet each photograph also speaks of tranquillity, peace, and hope for the future.
