In The Charisma Myth, Olivia Fox Cabane offered a groundbreaking approach to becoming more charismatic. Now she teams up with Judah Pollack to reveal how anyone can train their brain to have more eureka insights. The creative mode in your brain is like a butterfly. It's beautiful and erratic, hard to catch and highly valued as a result. If you want to capture it, you need a net. Enter the executive mode, the task-oriented network in your brain that help you tie your shoes, run a meeting, or pitch a client. To succeed, you need both modes to work together--your inner butterfly to be active and free, but your inner net to be ready to spring at the right time and create that "aha!" moment. But is there any way to trigger these insights, beyond dumb luck? Thanks to recent neuroscience discoveries, we can now explain these breakthrough moments--and also induce them through a series of specific practices. It turns out there's a hidden pattern to all these seemingly random breakthrough ideas. From Archimedes' iconic moment in the bathtub to designer Adam Cheyer's idea for Siri, accidental breakthroughs throughout history share a common origin story. In this book, you will learn to master the skills that will transform your brain into a consistent generator of insights. Drawing on their extensive coaching and training practice with top Silicon Valley firms, Cabane and Pollack provide a step-by-step process for accessing the part of the brain that produces breakthroughs and systematically removing internal blocks. Their tactics range from simple to zany, such as: - Imagine an alternate universe where gravity doesn't exist, and the social and legal rules that govern it. - Map Disney's Pocahontas story onto James Cameron's Avatar. - Rid yourself of imposter syndrome through mental exercises. - Literally change your perspective by climbing a tree. - Stimulate your butterfly mode by watching a foreign film without subtitles. By trying the exercises in this book, readers will emerge with a powerful new capacity for breakthrough thinking.

Michel Houellebecq is perhaps the single most successful and controversial of all contemporary novelists writing in French. Houellebecq has become a global publishing phenomenon: his books have been translated worldwide, three film adaptations of his work have been produced, and the author has been the subject of million-euro publishing deals and of successive media scandals in France. If Houellebecq is unique in contemporary French writing, it is thanks not only to his extraordinary success, but to the unparalleled scope of his narrative ambition. In the work which most forcefully marked his breakthrough to the mainstream - Les Particules é l é mentaires - Houellebecq made a significant appeal to the science-fiction genre in order to undergird his critique of contemporary society. For Houellebecq presents humanity - at least modern, western humanity - as in a terminal state of decadence and decline and ripe for replacement by its post-human successor. His novels narrate a metaphysical mutation or paradigm shift through which humanity as we know it ceases to be the over-riding value or focus of our world when it comes into conflict with a competitor in the form of a post-human or neo-human species. It is the aim of this book to appraise the global significance of Houellebecq's novelistic visions while at the same time situating them within the context of French literature, culture and society.
