"Requirements for Electrical Installations. IET Wiring Regulations", informally called in the electrical community The "Regs", is the national standard in the United Kingdom for electrical installation and the safety of electrical wiring in domestic, commercial, industrial, and other buildings, also in special installations and locations, such as marinas or caravan parks and medical locations.

BS 7671 - Wikipedia
Prior to 2006, different colours of cables were used in UK domestic electrical wiring and appliances for the neutral and live wires. The old colours were: Black. This was the neutral wire. Red. This was the live wire. Green & Yellow. Although still used today, the earth wire used to be

pure green prior to 1977.

The standard wiring colours in the UK
are (as of 2006) the same as
elsewhere in Europe and follow

international standard IEC 60446. This colour scheme had already been introduced for appliance flexes in the UK in the early 1970s, however the original red/black colour scheme recommended by the IEE for fixed wiring was retained until 2006, albeit with change to a green/yellow striped earth in 1976.

I know Lenny said there are symbols in the back of the OSG, but they are very basic and incomplete (not even the standard symbol for a DB). I have searched everywhere for a cheap electrical installation design package - but they are either non UK, micky mouse, or £1000.00 plus. Any help appreciated.
