Answer: Beagle Darwin was an unpaid scientist aboard the Beagle. It was his job to study rocks and plants and animals on the journey. Unfortunately, Darwin was seasick for the start of the journey but overcame this.

**Charles Darwin Trivia Questions & Answers | Page 2**

Darwin proposed natural selection. Natural selection is the pressure for species with advantageous traits to survive while those with less advantageous traits died. Darwin said that natural selection explained evolution. The Origin of Species was also important because it was the first time that a strong body of evidence, taken from a wide range of species and environments, had been assembled in support of evolution.

**Charles Darwin: Study Questions | SparkNotes**

11. What criticism did Jenkin bring against Darwin's theory of evolution by natural selection? The earth had not been in existence long enough for evolution to have taken place; The fossil record did not contain forms intermediate between today's species; Any new traits would disappear once they were blended with the population; All of the above
