A detectives strange and gruesome scrapbook of photos.

One of the Midwest's most accomplished homicide detectives reveals the secrets behind his most notorious cases. Part memoir, part police procedural, and part true crime anthology, *Death as a Living* reveals the inside world of homicide and death investigation—the triumph, tragedy, humor, and truly bizarre situations one finds when working that beat. For more than thirty years, involving more than one thousand cases, Burke has worked as a death investigator—first with the Dayton, Ohio police department, then with a county coroner's office. In *Death as a Living*, he shares his tricks of the trade: how detectives solve cases, what they look for, the importance of forensic science, and the irreplaceable value of instinct. Along the way, Burke offers humorous trial anecdotes, thoughts on race and policing, stories about the fatal toll stress took on fellow officers, and, perhaps most movingly, details about the three fatal shootings of police officers—one of them one of his first friends at the department, another the son of his sergeant—that shaped his career.

Scene Analysis and Reconstruction and Bloodstain Pattern Analysis with an Introduction to Crime Scene Reconstruction, Third Edition Those tasked with investigating death scenes come from a variety of backgrounds and varying levels of experience. Death Scene Investigation: Procedural Guide gives the less experienced investigator the procedures for almost any death scene imaginable while providing the seasoned investigator a ready reference for deaths occurring even under the most unusual of circumstances. It details the precise steps that need to be taken when processing and analyzing a death scene to ensure vital evidence is not lost and "red flags" are not missed. Using a bulleted format for quick and easy access, the book provides hands-on, concise instruction in a style friendly to a range of professionals. Topics discussed in this practical manual include: Initial response and scene evaluation. This section includes a death investigation decision tree to lead investigators to a preliminary cause of death. The section is broken down into natural, accidental, suicidal, and homicidal deaths. It also explores the role of the medical examiner and autopsy protocol. Recovery of human remains from open field, aquatic, and buried sites. This section also discusses estimating the time of death. Wound dynamics and mechanisms of injury. Manners of death include asphyxiation; sharp force, blunt force, and chopping injuries; handgun, rifle, and shotgun wounds; and explosive, thermal, and electrical injuries. Special death scene investigations. Discussions include child and infant death, sex-related death, and death scenes with multiple victims. Death scene management. This section covers documentation, sketching, photography and videography, special observations, and search procedures. Death scene evidence processing. Topics include bloodstain patterns, shooting scenes, and entomological, biological, trace, friction ridge, and impression evidence. An appendix contains precautions for handling bloodborne pathogens and 15 innovative worksheets for field use are available for download. Death scene responders who master the techniques in this volume will expedite solving the circumstances of the death and the closing of the case. Michael S. Maloney was interviewed in Volume 13 of Anil Aggrawal's Internet Journal of Forensic Medicine and Toxicology.

Written by an L. A. County homicide detective and former atheist, Cold-Case Christianity examines the claims of the New Testament using the skills and strategies of a hard-to-convince criminal investigator. Christianity could be defined as a "cold case": it makes a claim about an event from the distant past for which there is little forensic evidence. In Cold-Case Christianity, J. Warner Wallace uses his nationally recognized skills as a homicide detective to look at the evidence and eyewitnesses behind Christian beliefs. Including gripping stories from his career and the visual techniques he developed in the courtroom, Wallace uses illustration to examine the powerful evidence that validates the claims of Christianity. A unique apologetic that speaks to readers' intense interest in detective stories, Cold-Case Christianity inspires readers to have confidence in Christ as it prepares them to articulate the case for Christianity.

A Pulitzer Prize-winning reporter for the Los Angeles Times discusses the hundreds of murders that occur in the city each year, and focuses on the story of the dedicated group of detectives who pursue justice at any cost in the killing of Bryant Tennale.

Crime Scene Photography is a book wrought from years of experience, with material carefully selected for ease of use and effectiveness in training, and field tested by the author in his role as a Forensic Services Supervisor for the Baltimore County Police Department. While there are many books on non-forensic photography, none of them adequately adapt standard image-taking to crime scene photography. The forensic photographer, or more specifically the crime scene photographer, must know how to create an acceptable image that is capable of withstanding challenges in court. This book blends the practical functions of crime scene processing with theories of photography to guide the reader in acquiring the skills, knowledge and ability to render reliable evidence. Required reading by the IAI Crime Scene Certification Board for all levels of certification Contains over 500 photographs Covers the concepts and principles of photography as well as the "how to" of creating a final product Includes end-of-chapter

The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.
