The PowerBox Evolution is always the first choice when a small, robust battery backer system is required: the typical range of applications extends from warbirds to 3D aerobatic models and even to jets. The first series of the Evolution was introduced back in the year 2004, and since that time it has been continuously developed and improved.

PowerBox Systems - PowerBox Evolution

The PowerBox Evolution is always the first choice when a small, robust battery backer system is required: the typical range of applications extends from warbirds to 3D aerobatic models and even to jets.

PowerBox Systems - PowerBox Systems

The PowerBox Evolution is a modern power supply system containing all the electronic components required to power modern receivers, servos and models. Every single element, ICs, micro-controller and electronic circuit which is essenti-

Evolution - PowerBox Systems

The PowerBox Evolution Spektrum 4235 has been developed specifically for Spektrum pilots, and represents a combination of the proven PowerBox Evolution with a Spektrum nine-channel receiver in one compact device. All you need is three Spektrum DSMX satellites in order to obtain a completely redundant receiver and battery system.
