Fanuc Robotics Manuals User Guides - CNC Manual

The FANUC teach pendant is a hand-held device used to interact, program, and problem solve the robot and, in most cases, an essential part of a robot system. While there are other ways to program a robot, the teach pendant allows the operator to move around and watch the robot movement more closely and not have to be at a fixed terminal.

Fanuc Teach Pendant Manual - 12/2020

The teach pendant, operator panel, and peripheral device interface send each robot start signal. However the validity of each signal changes as follows depending on the mode switch and the DEADMAN switch of the operator panel, the teach pendant enable switch and the remote condition on the software.

ROBOT OPERATIONS Part 2

The FANUC teach pendant is designed for either left or right handed operation. The strap is typically placed on your non-dominate hand, leaving your dominate hand to hit most buttons and navigation keys. The strapped hand is used for the DeadMan switch and often the SHIFT key. The teach pendant is corded to the robot's main controller.
