What Is Forensic Serology? | National University

- Serology = the study of antigen-antibody reactions.
- Blood typing (A,B,O) is the most common lab test run.
- You need just 2 antisera to test for blood type.
- Type A clots with anti-A serum, Type B clots with anti-B serum
- Type AB clots when anti-A and anti-B are both present
- Type O will not clot with either or both sera.
