Top executives in international marketing and marketing professors give hands-on theoretical insights and practical guidelines for the most relevant problems in

international marketing. The book is structured by easily accessible marketing catchwords and contains one in-depth, compact article per catchword.

Forty-five prominent scholars engage in self-critical, state-of-the-art reflection on international studies to stimulate debates about successes and failures and to address the larger question of progress in the discipline. Written especially for the collection, these essays are in hardcover in the form of an easy-to-use handbook, and in paperback as a number of separate titles, each of which consists of a particular thematic cluster to merge with the range of topics taught in undergraduate and graduate courses in international studies. The themes addressed are realism, institutionalism, critical perspectives, feminist theory and gender studies, methodology (formal modeling, quantitative, and qualitative), foreign policy analysis, international security and peace studies, and international political economy. This collection provides an accessible and wide-ranging survey of the issues in the field as well as an invaluable bibliography, and will undoubtedly determine the shape of future research in international studies for the millennium. Paperbacks for course adoption: Realism and Institutionalism in International Studies Michael Brecher and Frank P. Harvey, Editors Conflict, Security, Foreign Policy, and International Political Economy: Past Paths and Future Directions in International Studies Michael Brecher and Frank P. Harvey, Editors Evaluating Methodology in International Studies Frank P. Harvey and Michael Brecher, Editors Critical Perspectives in International Studies Frank P. Annotation. This book constitutes the refereed proceedings of the 11th International Conference on High-Performance Computing, HiPC 2004, held in Bangalore, India in December 2004. The 48 revised full papers presented were carefully reviewed and selected from 253 submissions. The papers are organized in topical sections on wireless network management, compilers and runtime systems,

high performance scientific applications, peer-to-peer and storage systems, high performance processors and routers, grids and storage systems, energy-aware and high-performance networking, and distributed algorithms.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.
