As enlightening as The Facebook Effect, Elon Musk, and Chaos Monkeys—the compelling, behind-the-scenes story of the creation of one of the most essential applications ever devised, and the rag-tag team that built it and changed how we navigate the world Never Lost Again chronicles the evolution of mapping technology—the “overnight success twenty years in the making.” Bill Kilday takes us behind the scenes of the tech’s development, and introduces to the team that gave us not only Google Maps but Google Earth, and most recently, Pokémon GO. He takes us back to the beginning to Keyhole—a cash-strapped startup mapping company started by a small-town Texas boy named John Hanke, that nearly folded when the tech bubble burst. While a contract with the CIA kept them afloat, the company’s big break came with the first invasion of Iraq; CNN used their technology to cover the war and made it famous. Then Google came on the scene, buying the company and relaunching the software as Google Maps and Google Earth. Eventually, Hanke’s original company was spun back out of Google, and is now responsible for Pokémon GO and the upcoming Harry Potter: Wizards Unite. Kilday, the marketing director for Keyhole and Google Maps, was there from the earliest days, and offers a personal look behind the scenes at the tech and the minds developing it. But this book isn’t only a look back at the past; it is also a glimpse of what’s to come. Kilday reveals how emerging map-based technologies including virtual reality and driverless cars are going to upend our lives once again. Never Lost Again shows us how our worldview changed dramatically as a result of vision, imagination, and implementation. It’s a crazy story. And it all started with a really good map.

In this practical book, family counselor and best-selling author Gary Smalley, with John Trent, reveals a simple yet profound plan for a marriage of depth, warmth, and excitement. Astrology is finally getting personal! From the best-selling author of The Secret Language of Birthdays comes a revolution in charting your horoscope based on both the date and time of your birth that makes all other horoscope books irrelevant. With his "Personology" system, Gary Goldschneider has created a unique method which divides each of the twelve signs into five sub-types-such as Aquarius-Pisces Cusp, Pisces I, Pisces II, Pisces III, and Pisces-Aries Cusp-thereby sub-dividing the astrological year into 48 personology periods. The precision this allows is far beyond anything available in any other astrology book and provides a ground-breaking new way for readers to look not only at their own lives, but their interactions with those around them. The book comes packed with easy-to-follow charts covering the sun, eight different planets, and, unique to this book, the rapid fluctuations of the moon for every year from 1900 through 2025. The result is an unprecedented level of precision, as well as a beautifully illustrated volume destined to become the one and only book horoscope readers will treasure for the next twenty years.

The Third Edition of Police & Society offers a comprehensive introduction to policing in the United States. Author Roy Roberg is joined by prominent policing scholars Kenneth Novak and Gary Corder. Their thoroughly revised text is both descriptive and analytical in nature—covering the process of policing, police behavior, organization, operations, and historical perspectives. To adequately explain the complex nature of police operations in a democracy, the authors have integrated the most important theoretical foundations, research findings, and contemporary practices in a comprehensible, yet analytical, manner. Contemporary issues and future prospects of policing are fully addressed. The text features an emphasis on the relationship between the police and the community—as well as how this relationship has evolved over time. The impact of this evolution on current police practices, especially with respect to community policing and policing in the post-9/11 era, is explored. The new edition has been substantially updated and revised, with four new or significantly revised chapters: "Community Policing," "Legal Issues," "Higher Education," and "Contemporary and Emerging Issues." Importantly, new "Voices From the Field" boxes have been added to each chapter. Here, nationally known police officials provide their insights into contemporary police practices and problems in a thought-provoking format. Topics New to the Third Edition: \* Police auditor systems \* Early warning systems \* New forms of police stressors \* Officer safety and fatality reduction \* Terrorism and post-9/11 policing \* Globalization \* Policing and the mentally ill \* Search and seizure \* Legal issues in interrogations \* Civil liability \* Contemporary performance measures \* Racially biased policing/racial profiling Topics significantly expanded from the last edition include: \* The role of the police in history \* Broken windows \* Community policing today \* Police ethics and deviant behavior \* Use of force, brutality, and oversight mechanisms \* Women in policing \* Police suicide \* Responses to stress \* Officer culture \* Officer discretion \* Police paramilitary units (PPUs) \* Competat and Quality of Life policing \* Chicago and Madison updates \* Job satisfaction and community policing \* Directed patrols/crackdowns \* Higher education, satisfaction, and discipline \* Demographic changes in American society \* Police technology Police & Society also offers "Inside Policing" themed boxes which feature important research findings and brief descriptions of exemplary police programs and operations. The Third Edition also features an expanded glossary, with key terms at the beginning of each chapter. Ancillaries to enhance instruction include: \* An Interactive Student Study Guide on CD—included with each copy of the book \* A revised, dedicated Website \* All figures and tables in the text available in PowerPoint on CD
