Hyperautomation, blockchain, AI security, distributed cloud and autonomous things drive disruption and create opportunities in this year's strategic technology trends. Human augmentation conjures up visions of futuristic cyborgs, but humans have been

augmenting parts of the body for hundreds of years. Glasses, hearing aids and prosthetics evolved into cochlear implants and wearables.

Gartner's annual top 10 strategic technology trends highlight trends that will drive significant disruption and opportunity over the next five to 10 years. This year's trends focus on "people-centric smart spaces" — how technologies will affect people (i.e., customers, employees) and the places they live (i.e.,

home, office, car). IT leaders must decide what combination of the trends will drive the most innovation and strategy for their enterprise.

Top 10 Strategic Technology Trends for 2020 - Gartner

The top 10 strategic technology trends for 2020 are:

Hyperautomation.

Hyperautomation is the combination of multiple machine learning (ML), packaged software and automation tools to

deliver work. Hyperautomation refers not only to the breadth of the pallet of tools, but also to all the steps of automation itself (discover, analyze, design, automate, measure, monitor and reassess).
