Design Cernica

Professor Cernica has produced a great book.

It goes deep into

eccentric loadings of

shallow foundations and

does great illustration of

lateral earth pressures

and retaining wall

design. This book

continues with US

customary units or fps

and tries to show the

practical engineering

Geotechnical

side of the analysis. It is
well worth the price.

Geotechnical

The geotechnical engineer determines and designs the type of foundations, earthworks, and pavements required for the intended structures to be built.

Geotechnical engineers design foundations for such structures as high-rise buildings, bridges, and medium to large commercial buildings, but also work on smaller
