Heat Adventures In The Worlds Fiery Places Bill Streever

South Africa is considered the adventure capital of Africa and with good reason. It caters to thrill seekers of all kinds. From buny jumping the highest commercial bungee jumping the world at Bloukrans Bungee Jump on the Garden Route to cage diving with great white sharks, South Africa has it all.. We've done sandboarding and ziplining, kayaked with hippos and flying over Durban in a ...

"A bestselling scientist and nature writer who goes to any extreme to uncover the answers, Bill Streever sets off to find out what heat really means. Let him be your guide and you'll firewalk across hot coals and sweat it out in Death Valley, experience intense fever and fire, learn about the invention of matches and the chemistry of cooking, drink crude oil, and explore thermonuclear weapons and the hottest moment of all time-the big bang. Melting glaciers, warming oceans, forest fires, droughts-it's clear that today's world is getting hotter. But while we know the agony of a sunburn or the comfort of our winter heaters, do we really understand heat? Written in Streever's signature spare and refreshing prose, HEAT is an a compulsively readable personal narrative that leaves readers with a new vision of an everyday experience-how heat works, its history, and its complete connection to daily life"--

An adventurous ride through the most blisteringly hot regions of science, history, and culture. Melting glaciers, warming oceans, droughts-it's clear that today's world is getting hotter. But while we know the agony of a sunburn or the comfort of our winter heaters, do we really understand heat? A bestselling scientist and nature writer who goes to any extreme to uncover the answers, Bill Streever sets off to find out what heat really means. Let him be your guide and you'll firewalk across hot coals and sweat it out in Death Valley, experience intense fever and fire, learn about the invention of matches and the chemistry of cooking, drink crude oil, and explore thermonuclear weapons and the hottest moment of all time-the big bang. Written in Streever's signature spare and refreshing prose, HEAT is an adventurous personal narrative that leaves readers with a new vision of an everyday experience-how heat works, its history, and its relationship to daily life.

Ranulph Fiennes, the world's greatest living explorer, has travelled to some of the most remote, dangerous parts of the globe. Well-known for his experiences at the poles and climbing Everest, he has also endured some of the hottest conditions on the planet, where temperatures regularly exceed 40 degrees and, without water and shelter, death is inevitable.

A narrative account of the author's forays into some of the world's coldest regions describes his encounters with splashing through an Arctic swimming hole, investigations into ancient and more recent ice ages, and examinations of animal hibernation habits.

In this masterful account in the spirit of Bill Bryson and Ian Frazier, a longtime deep-sea diver masterfully weaves together the science and history of Earth's last remaining frontier: the sea. In an age of unprecedented exploration and innovation, our oceans remain largely unknown, and endlessly fascinating: full of mystery, danger, beauty, and inspiration. In Oceans Deep celebrates the daring pioneers who tested the limits of what the human body can endure under water: free divers able to reach 300 feet on a single breath; engineers and scientists who uncovered the secrets of decompression; teenagers who built their own diving gear from discarded boilers and garden hoses in the 1930s; saturation divers who lived under water for weeks at a time in the 1960s; and the trailblazing men who voluntarily breathed experimental gases at pressures sufficient to trigger insanity. Tracing both the little-known history and exciting future of how we travel and study the depths, Streever's captivating journey includes seventeenth-century leather-hulled submarines, their nuclear-powered descendants, a workshop where luxury submersibles are built for billionaire clients, and robots capable of roving unsupervised between continents, revolutionizing access to the ocean. In this far-flung trip to the wild, night-dark place of shipwrecks, trapped submariners, oil wells, innovative technologies, and people willing to risk their lives while challenging the deep, we discover all the adventures our seas have to offer -- and why they are in such dire need of conservation.

"No CGI can match what Vic can accomplish" - Steven Spielberg "Vic is The Man" - Pierce Brosnan "Vic Armstrong is, of course, a legend" - Martin Scorsese "This is the best and most original behind-the-scenes book I have read in years, gripping and revealing. Vic Armstrong is modest, humorous and wry - altogether brilliant company." - Roger Lewis, Daily Mail "[A] page-turner... I couldn't put it down! I had a great time reading this book and give it my highest recommendation." - Leonard Maltin "[Vic has] been this unheralded savior of movie magic for decades, and hearing how he makes the incredible credible is a must for any film fan." - Hollywood.com "Armstrong's a fascinating guy and a straight shooter. His book is fantastic." - Ain't It Cool News "The man is a legend in the industry... [A] mind-blowing, must-read biography." - Movies.com "The movie memoir of the year!" - SciFi Mafia "[Vic] talks to you like he's your cool uncle, or the uncle you wished you had, really down to earth, but at the same time you can tell he's got a twinkle in his eye as he's talking..." - Geek Six "A hell of a read." - Film School Rejects "The key to an entertaining autobiography is a combination of good stories to tell and a distinctive life; Armstrong has them both." - Library Journal "Armstrong has done it all." - Empire "A spills'n'thrills ride through a fast-forward life in pictures." - The Times "Armstrong takes us on the spectacular journey of his life that left me wondering who would be brave enough to play him in a movie. What a legacy! What a life! What a book!" -

Geeks of Doom -- Think you don't know Vic Armstrong? Wrong! You've seen his work in countless films... He's been a stunt double for James Bond, Indiana Jones and Superman, and he's directed action scenes for three Bond movies, Mission Impossible 3, Thor, and the upcoming The Amazing Spider-Man to name but a few. Counting Harrison Ford, Steven Spielberg and Arnold Schwarzenegger among his friends, and officially credited in the Guinness Book of World Records as the World's Most Prolific Stuntman, Vic's got a lot of amazing stories to tell, and they're all here in this - the movie memoir of the year!

From avalanches to glaciers, from seals to snowflakes, and from Shackleton's expedition to The Year Without Summer, Bill Streever journeys through history, myth, geography, and ecology in a year-long search for cold -- real, icy, 40-below cold. In July he finds it while taking a dip in a 35-degree Arctic swimming hole; in September while excavating our planet's ancient and not so ancient ice ages; and in October while exploring hibernation habits in animals, from humans to wood frogs to bears. A scientist whose passion for cold runs red hot, Streever is a wondrous guide: he conjures woolly mammoth carcasses and the ice-age Clovis tribe from melting glaciers, and he evokes blizzards so wild readers may freeze -- limb by vicarious limb.

Meet the chilli. It's a fiery little fruit. From humble origins in a tucked-away corner of Latin America, it has found its way into the food of more than half the world. Intrepid food writer Kay Plunkett-Hogge is on its trail, following the chilli from the Americas to Europe, and along the spice routes to the Middle East, India, China and beyond. With more than 120 delicious recipes from around the world, including Thai, Indian and Mexican favourites, plus tantalising desserts with a difference, Kay showcases the chilli's extraordinary versatility, celebrates its rich and nomadic history, and discovers the secrets of its success.
