This means you can determine the exact levels of protection against moisture. Instead of an item simply being |waterproof|. An IP rating is, in summary, a two digit code.

IP Ratings Explained: The "waterproof" IEC standard 60529 ...

The IEC 60529 test standard considers a rating of two as protection from solid objects greater than 12.5 mm. An IP of three means IP ingress protection against solid objects greater than 2.5 mm. Enclosures rated four offer protection from items that are solid objects greater than one mm.

IEC 60529 August 1, 2013 Degrees of Protection Provided by Enclosures (IP Code) This standard applies to the classification of degrees of protection provided by enclosures for electrical equipment with a rated voltage not exceeding 72,5 kV.

IEC 60529 - Degrees of Protection Provided by Enclosures ...

NEMA ANSI/IEC 60529:2004 (R2011) Degrees of protection provided by enclosures (ip code) ***identical national adoption*** Applies to the classification of degrees of protection provided by enclosures for electrical equipment with a rated voltage not exceeding 72.5 kV.

NEMA ANSI/IEC 60529:2004 (R2011) - Degrees of protection ...

The protection of enclosures against ingress of dirt or against the ingress of water is defined in IEC529 (BSEN60529:1991). Conversely, an enclosure which protects equipment against ingress of particles will also protect a person from potential hazards within that enclosure, and this degree of protection is also defined as a standard.

IP Protection Degree (IEC 60529) Explained

The IP Code, or Ingress Protection Code, sometimes referred to as International Protection Code, IEC standard 60529 classifies and rates the degree of protection provided by mechanical casings and electrical enclosures against intrusion, dust, accidental contact, and water. It is published by the International Electrotechnical Commission (IEC).

Below is a brief description of the two types of immersion tests included in ingress protection testing per the IEC 60529 test standard. IPX7 Testing: IP X7 immersion testing is defined as immersion in up to one meter of water. The IPX7 waterproofness test requirement is that the ingress of water is not considered to be in harmful quantities.

IPX7 & IPX8 Water Immersion | Keystone Compliance

IEC 60529 (Enclosure Standard) Section 13.4 Dust test for first characteristic numerals 5 and 6. The object of the test is to draw into the enclosure, by means of depression, a volume of air 80 times the volume of the sample enclosure tested without exceeding the extraction rate of 60 volumes per hour.

VS. IP IEC 60529 FOR ENCLOSURES - Kenall

The US ANSI (American National Standards Institute) and NEMA (National Electrical Manufacturer's Association) are members of IEC (IEC 60529) and contributed to its development. This standard is typically applied to commercial products and their ability to keep the environment from interfering with the operation of a product.
