This 25-item test presents information in the form of tables and graphs. You must extract the appropriate information or draw the appropriate conclusions from the information presented. Also included are basic math word problems. You are given 30 minutes to complete the test. "C" is the correct answer to the first problem. $585 + 476 + 650$ equals 1,711.

Industrial Skills Test (IST) Preparation Guide

About the IST. The IST (Industrial Skills Test) is designed to measure an applicant's skill and aptitude toward industrial duties, such as manufacturing, shipping, and distribution. Many companies use the IST to screen candidates' ability to follow standard work instructions and engage in basic processes commonly found in industrial environments. Preparing for the IST and becoming familiar with the types of questions found on the test can help you improve your results significantly.

Industrial Skills Test: Sample Tests With Answers

The problems below represent many of the math skills you will need to enter the field of precision metalworking. This test will help your teachers assess what skills you have learned in this program. This test is similar to some of the tests that employers give to job applicants. Take your time and carefully answer each question as best you can.
