Includes the seminal "Early History of Negro Minstrelsy," by Col. T. Allston Brown, together with pen-and-ink portraits of the major minstrels, and a comprehensive index.

A world list of books in the English language.

A cumulative index to biographical material in books and magazines.

Elementary Linear Programming with Applications presents a

survey of the basic ideas in linear programming and related areas. It also provides students with some of the tools used in solving difficult problems which will prove useful in their professional career. The text is comprised of six chapters. The Prologue gives a brief survey of operations research and discusses the different steps in solving an operations research problem. Chapter 0 gives a quick review of the necessary linear algebra. Chapter 1 deals with the basic necessary geometric ideas in  $R^n$ . Chapter 2 introduces linear programming with examples of the problems to be considered, and presents the simplex method as an algorithm for solving linear programming problems. Chapter 3 covers further topics in linear programming, including duality theory and sensitivity analysis. Chapter 4 presents an introduction to integer programming. Chapter 5 covers a few of the more important topics in network flows. Students of business, engineering, computer science, and mathematics will find the book very useful.

Gold has traditionally been regarded as inactive as a catalytic metal. However, the advent of nanoparticulate gold on high surface area oxide supports has demonstrated its high catalytic activity in many chemical reactions. Gold is active as a heterogeneous catalyst in both gas and liquid phases, and complexes catalyse reactions homogeneously in solution. Many of the reactions being studied will lead to new application areas for catalysis by gold in pollution control, chemical processing, sensors and fuel cell technology. This book describes the properties of gold, the methods for preparing gold catalysts and ways to characterise and use them effectively in reactions. The reaction mechanisms and reasons for the high activities are discussed and the applications for gold catalysis considered. Contents: Introduction to Catalysis The Physical and Chemical Properties of Gold Physical Properties and Characterisation of Small Gold Particles Preparation of Supported

Gold Catalysts  
Chemisorption of Simple Molecules on Gold  
Oxidation of Carbon Monoxide  
The Selective Oxidation of Carbon Monoxide  
Selective Oxidation  
Reactions Involving Hydrogen  
The Water–Gas Shift  
Reactions of Environmental Importance  
Catalysis by Soluble and Supported Gold Compounds  
Miscellaneous Reactions Catalysed by Gold  
Commercial Applications

Readership: Postgraduate level researchers in academia and industry, as well as general readers.

Keywords: Gold; Catalysis; Metallic Gold; Nanoparticles; Chemical Processing

Key Features: The first book to be entirely devoted to reactions catalysed by gold  
Written by authors who have extensive practical experience of gold catalysis  
Coverage of both homogeneous and heterogeneous catalysis by gold and its compounds

Reviews: “Catalysis by Gold is a book of great cultural relevance combined with a simple and pleasant reading. Certainly, it is an appropriate time in the remarkable progress of gold catalysis for the first comprehensive review of the subject. This excellent book should be essential reading for all those working in gold catalysis or seeking to exploit it — research students, industrialists, etc. — as well as for those working generally in the catalysis field.”*Gold Bulletin*
