If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced user of SAP BusinessObjects Dashboards, then this is the perfect book for you. Prerequisites include a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices.

Excel, the top number-crunching tool, now offers a vastly improved charting function to help you give those numbers dimension and relativity. John Walkenbach, a.k.a. Mr. Spreadsheet, clearly explains all these charting features and shows you how to choose the right chart for your needs. You’ll learn to modify data within the chart, deal with missing data, format your chart, use trend lines, construct “impossible” charts, create charts from pivot tables, dress them up with graphics, and more. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, Better Presentations details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—Better Presentations describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument for maximum engagement and persuasion. With a range of clear examples for what to do (and what not to do), the practical package offered in Better Presentations shares the best techniques to display work and the best tactics for winning over audiences. It pushes presenters past the frustration and intimidation of the process to more effective, memorable, and persuasive presentations.

* One of the world’s best-known Excel experts shows how to master the charting features in Excel 2000 and 2002 to create compelling graphic representations of data * Covers basic and advanced features, focusing on the new charting featuresprovided in version 2002 * Explains how to select charts for different categories of data, modify data in a chart, deal with missing data, format charts, customize shapes, and give charts a professional look

This book - the first comprehensive study of Marimekko designs - presents more than one hundred examples of exuberant Marimekko fashions and home furnishings that gave the company a definitive presence on the world design stage.

Learn how to make data-driven research accessible to decision makers, policymakers, and the general public Many researchers, scholars, and analysts fail to develop communication strategies that work in today’s crowded landscape of content, research, and data. To be successful, modern researchersneed to share their insights with the wider audience that lies beyond academia. Elevate the Debate helps researchers of all types more effectively communicate their work in any number of areas, from traditional news outlets to the new media platforms of the digital age. After reading this book, you will be inspired and equipped to use traditional and digital media environments to your advantage. This real-world guide helps you present your data-driven research with greater clarity, coherence, and impact. An array of practical strategies and proven techniques enables you to make your research accessible to diverse audiences, form engaging narratives, and design and implement meaningful outreach plans. Each chapter examines a specific communications strategy, such as data visualization, presentation skills, social media, blog writing, and reporter interactions. Written by expert members of the Urban Institute’s Communication department, and edited by Jonathan Schwabish, a Senior Fellow at Urban, Elevate the Debate guides you on how to use the media environment to your advantage and make a difference through policy insights and policy solutions. This valuable book teaches you how to: Develop and apply data-driven and story-focused communication Use the “Pyramid Philosophy” of rooting accessible, engaging communications products in sophisticated research. Solve problems with your research by defining goals and recommending conclusions-based actions Identify the researchers, organizations, funders, influencers, and policymakers who are most important to your goals and precisely target their information needs Employ communication styles and strategies to get your work in the hands of people who can use it and act upon it. Elevate the Debate: A Multi-layered Approach to Communicating Your Research is a must-have resource for academic researches, policy researchers, and all analysts of data-driven research.

More than 6 years after his death David Halberstam remains one of this country’s most respected journalists and revered authorities on American life and history in the years since WWII. A Pulitzer Prize-winner for his ground-breaking reporting on the Vietnam War, Halberstam wrote more than 20 books, almost all of them bestsellers. His work has stood the test of time and has become the standard by which all journalists measure themselves. Bill Belichick’s thirty-one years in the NFL have been marked by amazing success--most recently with the New England Patriots. In this groundbreaking book, THE EDUCATION OF A COACH, David Halberstam explores the nuances of both the game and the man behind it. He uncovers what makes Bill Belichick tick both on and off the field.

Now more than ever, content must be visual if it is to travel far. Readers everywhere are overwhelmed with a flow of data, news, and text. Visuals can cut through the noise and make it easier for readers to recognize and recall information. Yet many researchers were never taught how to present their work visually. This book details essential strategies to create more effective data visualizations. Jonathan Schwabish walks readers through the steps of creating better graphs and how to move beyond simple line, bar, and pie charts. Through more than five hundred examples, he demonstrates the do’s and don’ts of data visualization, the principles of visual perception, and how to make subjective style decisions around a chart’s design. Schwabish surveys more than eighty visualization types, from histograms to horizon charts, ridgeline plots to choropleth maps, and explains how each has its place in the visual toolkit. It might seem intimidating, but everyone can learn how to create compelling, effective data visualizations. This book will guide you as you define your audience and goals, choose the graph that best fits for your data, and clearly communicate your message.

NOW IN FULL COLOR! Written by sought-after speaker, designer, and researcher Stephanie D. H. Evergreen, Effective Data Visualization shows readers how to create Excel charts and graphs that best communicate their data findings. This comprehensive how-to guide functions as a set of blueprints—supported by both research and the author’s extensive experience with clients in industries all over the world—for conveying data in an impactful way. Delivered in Evergreen’s humorous and approachable style, the book covers the spectrum of graph types available beyond the default options, how to determine which one most appropriately fits specific data stories, and easy steps for building the chosen graph in Excel. Now in full color with new examples throughout, the Second Edition includes a revamped chapter on qualitative data, nine new quantitative graph types, new shortcuts in Excel, and an entirely new chapter on Sharing Your Data With the World, which provides advice on using dashboards. New from Stephanie Evergreen! The Data Visualization Sketchbook provides advice on getting started with sketching and offers tips, guidance, and completed sample sketches for a number of reporting formats. Bundle Effective Data Visualization, 2e, and The Data Visualization Sketchbook, using ISBN 978-1-5443-7178-8!
