mathematical tools

needed to understand
machine learning

include linear algebra,
analytic geometry,
matrix

decompositions,

vector calculus,

optimization,

probability and

statistics. These

topics are traditionally

taught in disparate

courses, making it

Access PDF Maths Links

hard for data science
or computer science
students, or
professionals, to
efficiently learn the
mathematics. This
self-contained
textbook bridges the
gap between
mathematical and
machine learning
texts, introducing the
mathematical
concepts with a

Acces PDF

Maths Links

minimum of Year 7 C

prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these

Acces PDF Maths Links

derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes

Access PDF Maths Links

worked examples and
exercises to test
understanding.
