The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Well-known investment authors Mark and Joann Skousen explain their "10-percent solution", a simple strategy for building wealth from small, steady investments. Readers who invest just one-tenth of their income can become financially independent even if they are on limited budgets--and even if they are currently in debt. High Finance on a Low Budget covers every aspect of investing open to low-income investors, including stocks, bonds, mutual funds, real estate, commodities, precious metals, art, tax shelters, and low-interest loans. Must reading for small, medium, and large investors--and especially for anyone on any income level who thinks investing is not for them.

In Smart Money Smart Kids, Financial expert and best-selling author Dave Ramsey and his daughter Rachel Cruze equip parents to teach their children how to win with money. Starting with the basics like working, spending, saving, and giving, and moving into more challenging issues like avoiding debt for life, paying cash for college, and battling discontentment, Dave and Rachel present a no-nonsense, common-sense approach for changing your family tree.

If you're looking for practical information to answer all your "How?" "What?" and "Why?" questions about money, this book is for you. Dave Ramsey's Complete Guide to Money covers the A to Z of Dave's money teaching, including how to budget, save, dump debt, and invest. You'll also learn all about insurance, mortgage options, marketing, bargain hunting and the most important element of all?giving. This is the handbook of Financial Peace University. If you've already been through Dave's nine-week class, you won't find much new information in this book. This book collects a lot of what he's been teaching in FPU classes for 20 years, so if you've been through class, you've already heard it! It also covers the Baby Steps Dave wrote about in The Total Money Makeover, and trust us?the Baby Steps haven't changed a bit. So if you've already memorized everything Dave's ever said about money, you probably don't need this book. But if you're new to this stuff or just want the all-in-one resource for your bookshelf, this is it!

Preserving the Promise: Improving the Culture of Biotech Investment critically examines why most biotech startups fail, as they emerge from universities into an ecosystem that inhibits rather than encourages innovation. This 'Valley of Death' squanders our public investments in medical research and with them, the promise of longer and healthier lives. The authors explicate the Translation Gap faced by early stage biotech companies, the result of problematic technology transfer and investment practices, and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies. In Preserving the Promise, Dessain and Fishman build on their collective experience as company founders, healthcare investor (Fishman) and physician/scientist (Dessain). The book offers a forward-looking, critical analysis of 'conventional wisdom' that encumbers commercialization practices. It exposes the self-defeating habits of drug development in the Valley of Death, that waste money and extinguish innovative technologies through distorted financial incentives. Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death Uncovers specific decision-making strategies that more effectively align incentives, improving clinical and financial outcomes for investors, inventor/entrepreneurs, and patients Examines the critical, early stages of commercialization, where technology transfer offices and Angels act as gatekeepers to development, and where tension between short-term financial and long-term clinical aspirations sinks important technologies Deconstructs the forces driving biotech, recasts them in a proven conceptual framework, and offers practical guidance for making the system better

This is the first English translation of one of the classical works of Marxist economic theory. When Rudolf Hilferding's Finance Capital was first published in 1919 it was acclaimed by reviewers as a continuation of Marx's Capital, and it has a major influence upon subsequent Marxist thought, especially in the analysis of imperialism where it provided some of the fundamental ideas for the theories of Bukharin and Lenin. But Hilferding's work was much more than a study of imperialism, which was presented only in the last section of the book. It set out to examine the main tendencies in the development of the capitalist mode of production as a whole at the beginning of the twentieth century, beginning with an exposition of the theory of money (in which particular attention was paid to the growth of credit money), then analysing the increasingly important role of the banks in the mobilization of capital, along with the development of large corporations, cartels and trusts, and finally outlining a theory of economic crises. Hilferding's book has, however, more than an historical interest. It is a model for any renewed attempt to understand the 'latest phase of capitalist development' in the closing decades of the twentieth century, and Hilferdin's ideas still provide essential elements for the elaboration of theoretically enlightened and realistic policies in the socialist movement.
