## Read Free New Arrivals Doents May 2012

This book reclaims postcolonial theory, addressing persistent limitations in the geographical, disciplinary, and methodological assumptions of its dominant formations. It emerges, however, from an investment in the future of postcolonial studies and a commitment to its basic premise: namely, that literature and culture are fundamental to the response to structures of colonial and imperial domination. To a certain extent, postcolonial theory is a victim of its own success, not least because of the institutionalization of the insights that it has enabled. Now that these insights no longer seem new, it is hard to know what the field should address beyond its general commitments. Yet the renewal of popular anti-imperial energies across the globe

## Read Free New Arrivals Doents May 2012

provides an important opportunity to reassert the political and theoretical value of the postcolonial as a comparative, interdisciplinary, and oppositional paradigm. This collection makes a claim for what postcolonial theory can say through the work of scholars articulating what it still cannot or will not say. It explores ideas that a more aesthetically sophisticated postcolonial theory might be able to address, focusing on questions of visibility, performance, and literariness. Contributors highlight some of the shortcomings of current postcolonial theory in relation to contemporary political developments such as Zimbabwean land reform, postcommunism, and the economic rise of Asia. Finally, they address the disciplinary, geographical, and methodological exclusions from postcolonial studies through a detailed focus on new disciplinary directions (management studies, international relations, disaster studies), overlooked locations and

perspectives (Palestine, Weimar Germany, the commons), and the necessity of materialist analysis for understanding both the contemporary world and world literary systems.

Does God exist? Does He do anything in this world? Famous authors like Richard Dawkins suggest strongly that it is very unlikely, but how unlikely is it? *God Doesn't; We Do* brings James A. Lindsay's mathematical expertise to the question and is able to put the matter under a microscope only available through an understanding of abstract mathematics, which he makes accessible to any reader.

## Read Free New Arrivals Doents May 2012

Because of that, this book will change the conversation about the existence of God. The central theme of this book, though, points out that even if there were a God, we have no reason to believe He does anything at all in this world. Thus the responsibility is on us, as it always has been, to make our world what it will be. From the back cover: Our world is one that is full of difficult challenges, and many people still turn to God for solutions or credit Him with ones that they find. The time for that kind of superstition is long passed. *God Doesn't; We Do* seeks to address the topic on philosophical grounds, making appeals to a scientific mindset and evidence-based decision making in fields where religion has dominated for centuries, including morality, politics, and even spirituality. The title really says it all- *God Doesn't; We Do: Only Humans Can Solve Human Challenges*.

## Read Free New Arrivals Doents May 2012

Spring 2012 saw the return to creative and critical success of Joss Whedon, with the release of both his horror flick *The Cabin in the Woods* and the box-office sensation, Marvel's *The Avengers*. After establishing himself as a premier cult creator, the man who gave us great television with *Buffy the Vampire Slayer*, *Angel*, *Firefly*, *Dollhouse* and web series *Dr Horrible's Sing-along Blog*, as well as comic books including *Fray* and *Astonishing X-Men*, finally became the filmmaker he'd long dreamed of being. Drawing on a wide variety of sources and making use of psychologist Howard Gruber's insights into the nature of the creative process, *Joss, A Creative Portrait* offers the first intellectual biography of Whedon, tracking his career arc from activated fan boy to film studies major, third generation television writer, successful script doctor, innovative television auteur, beloved cult icon, sought-after collaborator, and major filmmaker with

Marvel's *The Avengers*. Film and television scholar and Whedon expert David Lavery traces Whedon's multi-faceted magic from its source - the early influences of parents and teachers, comics, books, movies, collaborators - to its artistic incarnation.

This highly readable and timely book explores the transformation of the modern and contemporary art market in the 21st century from a niche trade to a globalised operation worth an estimated \$50 billion a year. Drawing on her personal experience, the author describes in fascinating detail the contributions made by a range of actors and institutions to these recent developments. The author's engaging style makes this informative text ideal for collectors, students, and anyone interested in learning more about the evolution of the unprecedented market for art which exists today.

Walker outlines the tools necessary to evaluate alternative investments and further diversify your portfolio using hedge funds, real estate, venture capital, gold and more. Using ground-breaking data on alternative investments, the author explores how to apply new risk measurements for building a portfolio with these investment vehicles.

Found in Alberta: Environmental Themes for the Anthropocene is a collection of essays about the natural environment in a province rich in natural resources and aggressive in development goals. This is a casebook on Alberta from which emerges a far wider set of implications for North America and for the biosphere in general. The writers come from an array of disciplinary backgrounds within the environmental humanities. The essays examine the oil/tar sands,

## Read Free New Arrivals Doents May 2012

climate change, provincial government policy, food production, industry practices, legal frameworks, wilderness spaces, hunting, Indigenous perspectives, and nuclear power. Contributions from an ecocritical perspective provide insight into environmentally themed poetry, photography, and biography. Since the actions of Alberta ' s industries and government are currently at the heart of a global environmental debate, this collection is valuable to those wishing to understand the natural and commercial forces in play. The editors present an introductory argument that frames these interests inside a call for a rethinking of our assumptions about the natural world and our place within it.

"The Congolese conflict has been dubbed a "forever war," a conflict that defies resolution. As of 2016, the Congo was experiencing its twentieth year of violent conflict, one of worst humanitarian calamities

## Read Free New Arrivals Doents May 2012

of our time and climbing the all-time charts. According to one study, 5.4 million people have died between 1998 and 2007 alone, largely from disease, though fighting and violence is ongoing to this day. This study aims to explain the most recent phases of the conflict, why it has lasted for so long, where diplomats and peacemakers have gone wrong in their approach to solving the violence, and how the Congo can help us understand contemporary armed conflict more broadly. Using the Congolese conflict as an illustrative case study, the author argues that three factors determine why conflicts there have persisted in some places while dwindling elsewhere: the cohesion, political culture, and constituencies of the belligerents. He finds that the more fragmented the belligerents, the more protracted the conflict becomes, and as they shift to see the conflict as an end in itself and to perceive violence as an acceptable and necessary tool of politics, the longer the conflict lasts.

## Read Free New Arrivals Doents May 2012

Finally, he develops a theory for how social constituencies shape negotiations between belligerents and the government by providing guarantees, brokering contacts, and presenting commitment problems"--
