This book provides a comprehensive and up-to-date listing of the sources of immunochemicals for use in laboratory-based specialties such as Histopathology. Much more than just a catalogue of these chemicals, it includes specific technical details on the application and specificities of antisera, common pitfalls in use and how to avoid them, an aspect not covered in other similar texts.

FIRST IN THE NEW YORK TIMES BESTSELLING CAT IN THE STACKS MYSTERY SERIES! Everyone in Athena, Mississippi, knows Charlie Harris, the good-natured librarian with a rescued Maine coon cat named Diesel that he walks on a leash. He 's returned to his hometown to immerse himself in books, but soon enough he 's entangled in a real-life thriller... A famous author of gory bestsellers and a former classmate of Charlie 's, Godfrey Priest may be the pride of Athena, but Charlie remembers him as an arrogant, manipulative jerk—and he 's not the only one. Godfrey 's homecoming as a distinguished alumnus couldn 't possibly go worse: by lunch, he 's put a man in the hospital. By dinner, Godfrey 's dead. Now it 's up to Charlie, with some help from Diesel, to paw through the town 's grudges and find the killer before an impatient deputy throws the book at the wrong person. But every last one of Charlie 's friends and co-workers had a score to settle with the nasty novelist. As if the murder wasn 't already purr-plexing enough...

A practical approach to conquering the complexities of Microservices using the Python tooling ecosystem About This Book A very useful guide for Python developers who are shifting to the new microservices-based development A concise, up-to-date guide to building efficient and lightweight microservices in Python using Flask, Tox, and other tools Learn to use Docker containers, CoreOS, and Amazon Web Services to deploy your services Who This Book Is For This book is for developers who have basic knowledge of Python, the command line, and HTTP-based application principles, and those who want to learn how to build, test, scale, and manage Python 3 microservices. No prior experience of writing microservices in Python is assumed. What You Will Learn Explore what microservices are and how to design them Use Python 3, Flask, Tox, and other tools to build your services using best practices Learn how to use a TDD approach Discover how to document your microservices Configure and package your code in the best way Interact with other services Secure, monitor, and scale your services Deploy your services in Docker containers, CoreOS, and Amazon Web Services In Detail We often deploy our web applications into the cloud, and our code needs to interact with many third-party services. An efficient way to build applications to do this is through microservices architecture. But, in practice, it's hard to get this right due to the complexity of all the pieces interacting with each other. This book will teach you how to overcome these issues and craft applications that are built as small standard units, using all the proven best practices and avoiding the usual traps. It's a practical book: you'll build everything using Python 3 and its amazing tooling ecosystem. You will understand the principles of TDD and apply them. You will use Flask, Tox, and other tools to build your services using best practices. You will learn how to secure connections between services, and how to script Nginx using Lua to build web application firewall features such as rate limiting. You will also familiarize yourself with Docker's role in microservices, and use Docker containers, CoreOS, and Amazon Web Services to deploy your services. This book will take you on a journey, ending with the creation of a complete Python application based on microservices. By the end of the book, you will be well versed with the fundamentals of building, designing, testing, and deploying your Python microservices. Style and approach This book is an linear, easy-to-follow guide on how to best design, write, test, and deploy your microservices. It includes real-world examples that will help Python developers create their own Python microservice using the most efficient methods.

Utopianism, alongside its more prevalent dystopian opposite together with ecological study has become a magnet for interdisciplinary research and is used extensively to examine the most influential global medium of all time. The book applies a range of interdisciplinary strategies to trace the evolution of ecological representations in Hollywood film from 1950s to the present, which has not been done on this scale before. Many popular science fiction, westerns, nature and road movies, as listed in the filmography are extensively analysed while particularly privileging ecological moments of sub.

This volume presents essential aspects of Mediterranean politics to be reconsidered in the light of the Arab upheavals since 2010. The focal point of the book is the question in how far European-Mediterranean relations are challenged by the various developments. It explores the relationship between security and democracy within the Arab countries and in European-Mediterranean relations. The ambiguity between the promotion of democratic values and the preservation of common interests in cooperation in economic and security affairs is stirred up by changing political actors and new conflictual constellations inside the Arab countries. All these changes evoke new challenges for all areas of the European-Mediterranean cooperation. Thus, the volume assembles contributions from different angles on the re-formulation of the European Neighbourhood Policy as well as the Democracy Assistance towards the Southern Mediterranean. It discusses the major security issues of a cooperative security architecture, counter-terrorism action, migration control and security sector reform in order to explore the relevant challenges in the field. The contributions analyse the recent developments and challenges, provide critical insights into those fields and endeavour to provide some proposals for improving Mediterranean cooperation on democracy and security. This book was published as a special issue of Democracy and Security.

Fifty years ago medicine was straightforward. Doctors had limited therapeutic options and patients did as they were told. Today, an array of medial interventions is putting increasing pressure on limited resources, patients are questioning everything and doctors are uncertain of their role. Health economists hoped to offer important insights to aid decision making, but their technical frameworks bore little resemblance to the practical requirements of end users. Now, this book presents the concepts and insights that health economics has to offer in a way that is accessible to every healthcare decision maker. Getting Health Economics into Practice is for all those who are involved in the planning, commissioning and delivery of healthcare. It illuminates the practical value that the concepts and principles of health economics can offer decision makers at all levels. Comprehensive and extensive, it is the first such book to be edited by a clinician rather than a health economist, with contributions from an expert panel of specialists. This approach ensures it is accessible and useful in the everyday work of health professionals. It is relevant for all healthcare sectors, in particular for Primary Care Trusts, and is essential reading for managers, researchers, and especially practitioners.

This book gives a comprehensive overview of surgery that results in creating an ileoanal pouch or continent ileostomy. It deals with the entire journey of pouch surgery starting from patient selection and counselling to technical tips and tricks and ending in managing pouch function and failure. Containing a patient experience section this volume helps clinicians better understand what a patient expects from the ileoanal pouch. This is a very specialised topic but one that is covered very poorly and this book has the potential to consolidate all that is known about the topic to provide a comprehensive overview on the surgery and its consequences.

This report is one of five volumes providing detailed information on the QA Tools, RAND's comprehensive, clinically based system for assessing quality of care for children and adults. The QA Tools indicators encompass screening, diagnosis, treatment, and follow-up in 46 clinical areas and cover a variety of modes of providing care, including history, physical examination, laboratory study, medication, and other interventions and contacts. Development of each indicator was based on the ratings of a panel of experts in the relevant fields and on a focused review of the scientific literature, which is clearly documented for each clinical condition. This volume focuses on indicators for care of oncologic conditions and HIV. Each chapter summarizes the results of the literature review for a particular condition, provides RAND staff's recommended indicators based on that review, and notes the level of scientific evidence supporting each indicator along with the relevant citations. In addition, this work details the process by which the expert panel evaluated the indicators and the final disposition of each indicator. Clinical conditions covered in this volume are: Breast cancer, cervical cancer, colorectal cancer, HIV, lung cancer, prostate cancer, skin cancer, cancer pain and palliation. Other RAND Health titles on the QA Tools system focus on indicators for care of children and adolescents, general medical conditions, cardiopulmonary conditions, and women.

Young children will be immersed in imaginative, messy play and crafts, while older ones can work on more complex activities like stone tool making and sourcing water. Whether in an organized setting, a group of friends or a family outing, the fun-filled games will build confidence, bonding and result in happy children. Entertaining anecdotes from the authors' own experience of surviving in the wild can be read aloud to children, bringing to life the thrilling reality of sleeping in a cave or savoring your first-ever foraged meal. Learn how to light a fire without matches, build a shelter to sleep in, cook on a fire, hunt for bugs and much more. From essential bushcraft basics and Stone Age survival skills to joyful outdoor play, this book is packed with ideas to bring children closer to nature and all its magical offerings.
