Child and Parent Observation Form ¶ How a child and his parent interact with one another will be determined by using this form. Specifically, the form must cater the child and the parent's information which are their names along with the child's date of birth. There are two separate sections wherein the first is the observation for the child's interaction while the second is for the parent's responses toward the child.

The observation model was an adjusted version of the Tavistock Model for studying infants. The original model observes a baby, an hour a week for the first one or two years of life, within the family home (Fawcett 2009). The observer does not take notes, as it allows them to notice all behaviours, movements and expressions of the child.
