Culture and Identity by Anita Jones Thomas and Sara E. Schwarzbaum engages students with autobiographical stories that show the intersections of culture as part of identity formation. The easy-to-read stories centered on such themes as race, ethnicity, gender, class, religion, sexual orientation, and disability tell the real-life struggles with identity development, life events, family relationships, and family history. The Third Edition includes an expanded framework model that encompasses racial socialization, oppression, and resilience. New discussions of timely topics include race and gender intersectionality, microaggressions, enculturation, cultural homelessness, risk of journey, spirituality and wellness, and APA guidelines for working with transgendered individuals.

Why and how do contemporary questions of culture so readily become highly charged questions of identity? The question of cultural identity lies at the heart of current debates in cultural studies and social theory. At issue is whether those identities which defined the social and cultural world of modern societies for so long - distinctive identities of gender, sexuality, race, class and nationality - are in decline, giving rise to new forms of identification and fragmenting the modern individual as a unified subject. Questions of Cultural Identity offers a wide-ranging exploration of this issue. Stuart Hall firstly outlines the reasons why the question of identity is so compelling and yet so problematic. The cast of outstanding contributors then interrogate different dimensions of the crisis of identity; in so doing, they provide both theoretical and substantive insights into different approaches to understanding identity.

In this book, I attempt to show how colonial and postcolonial political forces have endeavoured to reconstruct the national identity of Morocco, on the basis of cultural representations and ideological constructions closely related to nationalist and ethnolinguistic trends. I discuss how the issue of language is at the centre of the current cultural and political debates in Morocco. The present book is an investigation of the ramifications of multilingualism for language choice patterns and attitudes among Moroccans. More importantly, the book assesses the roles played by linguistic and cultural factors in the development and evolution of Moroccan society. It also focuses on the impact of multilingualism on cultural authenticity and national identity. Having been involved in research on language and culture for many years, I am particularly interested in linguistic and cultural assimilation or alienation, and under what conditions it takes place, especially today that more and more Moroccans speak French and are influenced by Western social behaviour more than ever before. In the process, I provide the reader with an updated description of the different facets of language use, language maintenance and shift, and language attitudes, focusing on the linguistic situation whose analysis is often blurred by emotional reactions, ideological discourses, political biases, simplistic assessments, and ethnolinguistic identities.

Cultural Identity In Transition Analyses The Challenges That Globalisation And Modernisation Have Brought To Cultural Identity In Recent Years. This Collection Of Articles Highlights Some Of The Central Theoretical Ideas And Models Currently Used In The Analysis Of Cultural Identity In The Social And Cultural Sciences. While The Book's Main Regional Focus Is On Northern Europe, This Is Complemented By Several Case Studies Addressing Issues Of Cultural Identity In Indigenous And Ethnic Communities, In Literary And Artistic Expression, And In Terms Of National Politics Around The World. The Book Discusses In Detail The Questions Like : What Is At Stake In The Global Culture Industry In Terms Of Cultural Identity? How Do The Internet And Information Technology In General Empower Local Communities? What Kinds Of Political Struggles And Conflicts Can Be Associated With The Processes Of Cultural Identity? Cultural Identities Are In Transition, But In What Direction Are They Moving? Cultural Identity In Transition Will Be Essential Reading For University Students And Researchers In Sociology, Anthropology, And Cultural And Literary Studies.

This volume aims to build on the approach to cultural psychology originally developed by the Russian psychologist Vygotsky and his colleagues Luria and Leontiev by providing qualitative methods such as interview techniques and content analysis as empirical tools for exploring the cultural aspects of psychology, and specific guidelines for formulating, conducting, and analyzing interviews on cultural aspects of psychology.

The pursuit of higher education has become increasingly popular among students of many different backgrounds and cultures. As these students embark on higher learning, it is imperative for educators and universities to be culturally sensitive to their differing individualities. Student Culture and Identity in Higher Education is an essential reference publication including the latest scholarly research on the impact that gender, nationality, and language have on educational systems. Featuring extensive coverage on a broad range of topics and perspectives such as internationalization, intercultural competency, and gender equity, this book is ideally designed for students, researchers, and educators seeking current research on the cultural issues students encounter while seeking higher education.

Multiculturalism is a prevalent worldwide societal phenomenon. Aspects of our modern life, such as migration, economic globalization, multicultural policies, and cross-border travel and communication have made intercultural contacts inevitable. High numbers of multicultural individuals (23-43% of the population by some estimates) can be found in many nations where migration has been strong (e.g., Australia, U.S., Western Europe, Singapore) or where there is a history of colonization (e.g., Hong Kong). Many multicultural individuals are also ethnic and cultural minorities who are descendants of immigrants, majority individuals with extensive multicultural experiences, or people with culturally mixed families; all people for whom identification and/or involvement with multiple cultures is the norm. Despite the prevalence of multicultural identity and experiences, until the publication of this volume, there has not yet been a comprehensive review of scholarly research on the psychological underpinning of multiculturalism. The Oxford Handbook of Multicultural Identity fills this void. It reviews cutting-edge empirical and theoretical work on the psychology of multicultural identities and experiences. As a whole, the volume addresses some important basic issues, such as measurement of multicultural identity, links between multilingualism and multiculturalism, the social psychology of multiculturalism and globalization, as well as applied issues such as multiculturalism in counseling, education, policy, marketing and organizational science, to mention a few. This handbook will be useful for students, researchers, and teachers in cultural, social, personality, developmental, acculturation, and ethnic psychology. It can also be used as a source book in advanced undergraduate and graduate courses on identity and multiculturalism, and a reference for applied psychologists and researchers in the domains of education, management, and marketing.

This collection brings together the ideas of key global scholars focusing on the lives of youth and young adults, examining their visual and cultural identity constructs. Embracing an international perspective encompassing the Global North and Global South, chapters explore expressions and performances of youth and young adults as shifting and entangled, in and through the clothed body, gender, sexuality, race, artistic and pedagogical making practices, in spaces and places, framed by new materialism, social media, popular and material culture. The overarching emphasis of the collection is on youth and young adults' strategies for engaging in and with the world, becoming a someone, and belonging, in settings that include a juvenile arbitration program, an artist community, high schools, universities, families and social media. This truly interdisciplinary and international collection will have resonance not just within cultural and media studies, but also in education, anthropology, sociology, gender studies, child and youth studies, visual culture, and communication studies.

This book offers a clear, easily adaptable model for understanding and working with cultural differences in therapy.
