Socket io Node Js Node

Hello everyone. Today I will explain about socket.io in Node JS. Socket.io is used for real time

Read PDF Socket Io Node Js Node Serialport Arduino

communication between applications. In chat application and some other applications you can use socket.io. Communication between applications using socket.io is very speedy. Socket.io is also used in IOT (Internet of things) for real time object status.

Socket.io Programming With Example In Node.js

Socket.io is a library that allows real-time, event-based communication in Node.js and browser-based applications. It uses the implementation of WebSockets protocol and offers some advantages over the protocol itself. If you're not familiar with WebSockets, WebSockets allows you to communicate between a client and a server in a nonstandard way.

Build a Chat App with Node.js and Socket.io

Example. Using Node.JS Cluster. Just like NginX, Node.JS comes with built-in clustering support through the cluster module.. Fedor Indutny has created a module called sticky session that ensures file descriptors (ie: connections) are routed based on the originating remoteAddress (ie: IP). Please note that this might lead to unbalanced routing, depending on the hashing method.

Using multiple nodes | Socket.IO

Note: the `app.use ('/static')` line, will expose the `node_modules` folder in the server, this in order to
