Stress testing - KPMG Global

Stress tests are an essential tool for banking supervisors. European banks may currently be focused on 2020's round of tests, but the ECB and EBA are already turning their thoughts to the future. Recent speeches by ECB Supervisory Chair Andrea Enria 1 and ECB Vice-President Luis de Guindos 2 show that the supervisor is well aware of the current approach's limitations.

The Future of Stress Testing - KPMG Global

Dynamic financial modelling and stress testing processes will be key to this understanding. We are helping our clients through this process and assist with all aspects of the required analyses, including the development of macroeconomic scenarios, credit loss modelling and impact analysis on regulatory ratios.

Stress testing, financial analysis and forecasting - KPMG ...

The ORSA considers reverse stress testing, the purpose of which is to identify stresses and scenarios that could lead to the failure of the business. The ORSA process typically takes several months, with the Board considering the range of stresses and scenarios to be considered and the core central business plan early in the year.

Stress and Scenario Testing – never more important - KPMG ...

KPMG's 4-Step Approach to Stress Testing KPMG recommends to Banks to run "targeted stress tests" to identify vulnerable credit, sector and supply chains and take proactive action STEP 1 STRESS LOAN PORTFOLIOS • Design scenarios (i.e. travel bans, supply chain shocks, retail shocks) • Stress underlying cashflow and debt service ratios

KPMG Roundtable Series

In this report, KPMG presents the results of its 2016 global benchmarking assessment of stress testing, which draws on information surveyed from Global Systemically Important Banks (G-SIBs) and Domestic Systemically Important Banks (D-SIBs). We have leveraged our own experiences supporting major institutions in the design and delivery of stress testing programs in North America, Europe, the United Kingdom and Asia to analyse and interpret the survey data.

Stress testing - assets.kpmg

Supervisors are increasingly using stress tests as a means of imposing tougher capital requirements than are set in the minimum capital standards. The tougher the stress test, the higher the number of banks that will fail the test, even if they currently meet minimum capital standards on an un-stressed basis.

Stress Testing - KPMG Belgium

The barriers to the more widespread integration of stress testing into business decision making can partly be explained by analyzing the manner in which stress testing is conducted. While we have observed a range of approaches and varying degrees of centralization, the majority of institutions coordinate stress testing at the center but with calculations distributed to a wider network.

Benefits of stress testing at banks - KPMG Global

A new KPMG assessment of stress testing practices at 19 systemically important banks (SIBs) found significant progress has been made by the banks in developing stress testing frameworks. As a result, banks stronger capital positions leads to greater capability to absorb all but the most severe shocks while continuing to meet the minimum hurdles applied by regulators.

Survey findings: Stress testing benchmarking analysis - KPMG

stress tests to identify which obligors in a given supply chain the bank has exposure to and how severe the impact might be. Other stress models that look at contagion within industries/supply chains over multi -period stress events can be leveraged (i.e. Davis and Lo). kpmg.com/cn

Stress testing loan portfolios in times of crisis

Stress testing allows you to assess the impact on the financial health of your business as a result of applying greater than normal changes to key assumptions (that drive the business). Consider how changes to assumptions impact financial performance (i.e. the profit and loss), financial position (i.e. the balance sheet) and cash flow.

COVID-19: Financial stress testing for SMEs - KPMG Australia

intense scrutiny banks are under, KPMG International conducted a survey of 19 systemically important banks (SIBs) throughout the summer of 2016. The objectives of the survey were two-fold, firstly to assess the current state of stress testing globally and secondly, to form a view on the potential future state of stress testing in the years to come.
