[How to position your speakers perfectly - CNET](#)

The numbers in the name refer to the number of speakers the format can use. So five-point-one uses five discrete full-range audio channels – three speakers at the front, which are stereo left and right, plus a center-channel mono and two surround sound speakers at the side or rear of the listener. The "point-one" in five-point-one refers to the sixth, low-frequency effects channel, which carries bass sound to the woofer or subwoofer.

[Surround Sound Basics | DIY](#)

The center channel should be as close to ear height as your setup allows and can be placed either above or below the screen. If you cannot place the speaker as close to the bottom or top of the screen as you would like, you can angle the speaker up or down slightly to direct the sound more towards the listener's

head.

How to Place Your Speakers to Maximize Your Home Theater ...

All the low-frequency effects (LFEs), such as explosions and musical bass, are assigned to the subwoofer. When connected and arranged correctly, the speakers in a surround sound setup work together to properly fill the room based on its size and direct the sound towards the viewing and listening area.

Surround Sound Setup - The Definitive Guide | Klipsch

The placement of a 3.1 channel surround sound is the same as the 2.1 channel setup, except you will have one additional speaker- the center speaker. The center speaker should be placed directly in the middle of the audio source, between the left and right speakers.

Guide to Perfect Surround Sound Speaker Placement | Modern ...

The Surround Sound Speakers The left and right surround speakers (shown as "A" in Fig. D below) must be placed equally to each side and slightly above and behind the viewing position. Left and right rear surround speakers (shown as "B") should also be about three feet above (and behind) the seated listeners' heads.

How to Set Up a 7.1 Surround Sound Speaker System | Klipsch

How to set up your system To create an optimal sound system enabled with Dolby Atmos®, first familiarize yourself with the role and position of each speaker. Then choose a central seating point and angle your speakers at it, keeping them at your ear height when you are seated, unless noted otherwise.

5.1 Virtual Speaker Setup - Dolby

If you're installing 5, 6, or 7 ceiling speakers for a home cinema surround sound system: Place the front left and right speakers at an equal distance from your main listening position, in front of your TV, LCR ceiling speakers are the best option for this although a good ceiling speaker with a pivoting tweeter will also work.

In-wall and Ceiling Speakers Placement Guide ...

Surround speakers placement If you're using rear surround speakers, face them toward the front of the room, as illustrated above. If you're using side surrounds, aim them toward each other. If your speakers' tweeters can swivel, aim them toward your seating position.

In-wall and Ceiling Speaker Placement and Installation

Surround Sound In-Ceiling Speaker Placement Front in-ceiling speakers aren't the best choice for a home theater because they lessen the impact of sound "coming from the screen." If you're going that route, though, be sure to install all the speakers 2-3 feet away from the wall in order to avoid excess reflected sound.
