Industrial design is a process of design applied to products that are to be manufactured through techniques of mass production. Its key characteristic is that design is separated from manufacture: the creative act of determining and defining a product's form and features takes place in advance of the physical act of making a product, which consists purely of repeated, often automated, replication.

Industrial Design. by. John Heskett. 3.62 · Rating details · 53 ratings · 1 review. The products of industry are omnipresent; at home, in the street, they form the man-made landscape of our lives. The author's highly original, broadly based approach shows how many and how diverse are the forces that have shaped the manufactured forms surrounding us during the past two centuries: the creativity of individual designers and design teams, technical innovation.
