Adopting new and much more comprehensive concepts of both power and politics, The Retreat of the State develops a theoretical framework to show who really governs the world economy. It goes on to explore some of the non-state authorities, from mafias to the Big Six accounting firms and international bureaucrats, whose power over who gets what in the world encroaches on that of national governments.

Not only governments, argues Susan Strange in The Retreat of the State. Big businesses, drug barons, insurers, accountants and international bureaucrats all encroach on the so-called sovereignty of the state. Professor Strange examines the implications of this rivalry and points to some new directions for research in internatio

“The diffusion of authority away from national governments has left a yawning hole of nonauthority, ungovernance it might be called”. The Retreat of the State follows logically from Rival States, Rival Firms (1991), in which Strange and John Stopford argued that competition for global market shares has replaced competition for territory.

This original study asks who is really in charge of the world economy.

DIVSince the end of the Cold War, the assumption among most political theorists has been that as nations develop economically, they will also become more democratic—especially if a vibrant middle class takes root. This assumption underlies the expansion of the European Union and much of American foreign policy, bolstered by such examples as South Korea, the Philippines, Taiwan, and even to some extent Russia. Where democratization has failed or retreated, aberrant conditions take the blame: Islamism, authoritarian Chinese influence, or perhaps the rise of local autocrats./divDIV /divDIVBut what if the failures of democracy are not exceptions? In this thought-provoking study of democratization, Joshua Kurlantzick proposes that the spate of retreating democracies, one after another over the past two decades, is not just a series of exceptions. Instead, it reflects a new and disturbing trend: democracy in worldwide decline. The author investigates the state of democracy in a variety of countries, why the middle class has turned against democracy in some cases, and whether the decline in global democratization is reversible./div

Village China Under Socialism and Reform offers a comprehensive account of rural life after the communist revolution, detailing villager involvement in political campaigns since the 1950s, agricultural production under the collective system, family farming and non-agricultural economy in the reform, and everyday life in the family and community. Li’s rich examination draws on original documents from local agricultural collectives, newly accessible government archives, and his own fieldwork in Qin village of Jiangsu province to highlight the continuities in rural transformation. Firmly disagreeing with those who claim that recent developments in rural China represent a radical break with pre-reform sociopolitical practices and patterns of production, Li instead draws a clear history connecting the current situation to ecological, social, and institutional changes that have persisted from the collective era.

This title was first published in 2000. Focusing on the contribution of Susan Strange to the study of international political economy, this collection forms a unique perspective on the global economy whilst providing tools for the reader to better understand that economic system. The book examines Susan Strange’s structural power theories, whilst adding the perspective of the contributor. The combination of approaches and experience provides a multifaceted analysis of international relations and international political economy.

The eminent China scholar delivers a landmark study of Chinese culture ´ s relationship to the natural environment across thousands of years of history. Spanning the three millennia for which there are written records, The Retreat of the Elephants is the first comprehensive environmental history of China. It is also a treasure trove of literary, political, aesthetic, scientific, and religious sources, which allow the reader direct access to the views and feelings of Chinese people toward their environment and their landscape. China scholar and historian Mark Elvin chronicles the spread of the Chinese style of farming that eliminated elephant habitats; the destruction of most of the forests; the impacts of war on the landscape; and the re-engineering of the countryside through gigantic water-control systems. He documents the histories of three contrasting localities within China to show how ecological dynamics defined the lives of the inhabitants. And he shows that China in the eighteenth century was probably more environmentally degraded than northwestern Europe around this time. Indispensable for its new perspective on long-term Chinese history and its explanation of the roots of China ´ s present-day environmental crisis, this book opens a door into the Chinese past.

An ´ insightful and harrowing ´ analysis of the state of Western-style democracy by the Financial Times columnist and author of Time to Start Thinking (The New York Times). In his widely acclaimed book Time to Start Thinking, Financial Times columnist Edward Luce charted the course of America ´ s economic and geopolitical decline, proving to be a prescient voice on the state of the nation. In The Retreat of Western Liberalism, Luce makes a larger statement about the weakening of western hegemony and the crisis of democratic liberalism—of which Donald Trump and his European counterparts are not the cause, but a symptom. Luce argues that we are on a menacing trajectory brought about by ignorance of what it took to build the West, arrogance toward society ´ s economic losers, and complacency about our system ´ s durability—attitudes that have been emerging since the fall of the Berlin Wall. Unless the West can rekindle an economy that produces gains for the majority of its people, its political liberties may be doomed. Combining on-the-ground reporting with economic analysis, Luce offers a detailed projection of the consequences of the Trump administration and a forward-thinking analysis of what those who believe in enlightenment values must do to protect them.
