The Stages of Memory: Reflections on Memorial Art, Loss...

From around the world, whether for New York City's 9/11 Memorial, at exhibits devoted to the arts of Holocaust memory, or throughout Norway's memorial process for the murders at Utøya, James E. Young has been called on to help guide the grief stricken and survivors in how to mark their losses. This poignant, beautifully written collection of essays offers personal and professional considerations of what Young calls the "stages of memory," acts of commemoration that include spontaneous memorials of flowers and candles as well as permanent structures integrated into sites of tragedy. As he traces an arc of memorial forms that spans continents and decades, Young returns to the questions that preoccupy survivors, architects, artists, and writers: How to articulate a void without filling it in? How to formalize irreparable loss without seeming to repair it? Richly illustrated, the volume is essential reading for those engaged in the processes of public memory and commemoration and for readers concerned about how we remember terrible losses.

Though we live in a time when memory seems to be losing its hold on communities, memory remains central to personal, communal, and national identities. And although popular and public discourses from speeches to films invite a shared sense of the past, official sites of memory such as memorials, museums, and battlefields embody unique rhetorical principles. Places of Public Memory: The Rhetoric of Museums and Memorials is a sustained and rigorous consideration of the intersections of memory, place, and rhetoric. From the mnemonic systems inscribed upon ancient architecture to the roadside accident memorials that line America's highways, memory and place have always been deeply interconnected. This book investigates the intersections of memory and place through nine original essays written by leading memory studies scholars from the fields of rhetoric, media studies, organizational communication, history, performance studies, and English. The essays address, among other subjects, the rhetorical strategies of those vying for competing visions of a 9/11 memorial at New York City's Ground Zero; rhetorics of resistance embedded in the plans for an expansion of the National Civil Rights Museum; representations of nuclear energy—both as power source and weapon—in Cold War and post-Cold War museums; and tours and tourism as acts of performance. By focusing on "official" places of memory, the collection causes readers to reflect on how nations and local communities remember history and on how some voices and views are legitimated and others are minimized or erased.

Nora Ephron returns with her first book since the astounding success of I Feel Bad About My Neck, taking a cool, hard, hilarious look at the past, the present, and the future, bemoaning the vicissitudes of modern life, and recalling with her signature clarity and wisdom everything she hasn't (yet) forgotten. Ephron writes about falling hard for a way of life ("Journalism: A Love Story") and about breaking up even harder with the men in her life ("The D Word"); lists "Twenty-five Things People Have a Shocking Capacity to Be Surprised by Over and Over Again" ("There is no explaining the stock market but people try"; "You can never know the truth of anyone's marriage, including your own"; "Cary Grant was Jewish"; "Men cheat"); reveals the alarming evolution, a decade after she wrote and directed You've Got Mail, of her relationship with her in-box ("The Six Stages of E-Mail"); and asks the age-old question, which came first, the chicken soup or the cold? All the while, she gives candid, edgy voice to everything women who have reached a certain age have been thinking. . . . but rarely acknowledging. Filled with insights and observations that instantly ring true—and could have come only from Nora Ephron—Remember Nothing is pure joy.

From the heartbreak of giving up one's driver's license to the joys of geriatric dating, Nardi Reeder Campion brings her distinctive mix of wit and candor to the subject of aging. The eighty-eight-year-old author approaches the challenges of growing older with imagination and an undimmed zest for life, from exercises that improve one's memory ("for me, memory is the thing I forget with") to creative solutions to being carless in rural America (she does not recommend hitchhiking). Campion considers with amusement both the things that change (society's attitudes toward sex) and those that remain the same (her own inability to use the f-word). She shares her love of tea and travel, her pleasure in family and friends, and her ongoing frustration at her penchant for losing items large and small, worthless and precious. And she introduces us to some notable people she has met along the way whose influence she continues to feel. Whether inviting her retirement home neighbors to watch a belly-dancer or taking a long-dreamed-of trip to Paris and Normandy at eighty-six, Campion shows that aging can be both funny and fun. If you or someone you know happens to be aging, this book is for you.

An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. Memories, Dreams, Reflections is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII Sermones ad Mortuos.

Exploring the art, architecture, and design of memorials around the world from the late twentieth century to today Memorials hold a special position in the cultural memory of communities, cultures and nations, and In Memory Of demonstrates this as never before. This extraordinary and moving collection of more than 60 exceptional structures commemorates some of the most destructive events of the 20th and 21st centuries, including war, genocide, massacre, terrorism, famine, and slavery. At the same time, In Memory Of shows that the power to overcome, to survive, even to forgive, is just as impactful and important. Thoughtful essays on the subjects of hope, strength, grief, loss, and fear help to contextualize the projects and address the emotional aspects of memorialization.

"Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind."--Allibris.

Reality's Pen portrays the Eastside of Asheboro, NC as a mother who provides a safe cocoon filled with neighborly concern and care. This location, aka "The Hill," is a place of magic, with a sense of community pervading the air. This comfortable milieu flung author Thomas D. Rush out into the world like a cultural arrow aimed at intriguing future events. From a 1989 one-on-one, prophetic conversation with the first African-American President of the United States, to a mystical revelation from a mentor to Martin Luther King, Jr., Reality's Pen provides a mesmerizing tapestry of reflections. Rush includes his timely residence in celebratory Chicago, along with an enticing view of fellow North Carolinian Michael Jordan, as Jordan led his Chicago Bulls to their first NBA championship.

You may remember visiting a grandparent or elder friend who lived in a nursing home memory unit. When you were a child you may recall sights, sounds, and smells that caused you to feel uneasy. Step into any one of today's 16,000 long-term care facilities across the US, and suddenly those memories reemerge. Nurse Supervisor K. Allen tells of the emotional investments found while working with seniors inside the Van Gogh, a large upscale urban assisted living complex. Located at its core is found a locked memory care unit, the Rembrandt, where he and his heroic support team struggle to comfort those suffering from Alzheimer's and other types of Dementia. Emotionally rich and deeply moving, Remembering What I Forgot tells of a day in the life of a memory unit nurse and the unimaginable obstacles faced by todays health care workers. A first of its kind, the story provides its reader with a rare glimpse into "life on a memory unit" including the emotional torment experienced by visitors who witness their loved one slip into ever increasing apathy and confusion. In its truest sense a love story of the need to cope and how to find hope when someone we love suddenly cannot remember well and is handed a diagnosis of Dementia. Insightful, humorous and heartfelt, Remembering What I Forgot conveys a message of inspiration and helps us connect with those in the final chapter of their life. Let us not forget them.
