With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

Managerial Accounting provides students with a clear introduction to fundamental managerial accounting concepts. One of the major goals of this product is to orient students to the application of accounting principles and techniques in practice. By providing students with numerous opportunities for practice with a focus on real-world companies, students are better prepared as decision makers in the contemporary business world.
